"Pizza Mania" - Team 'S'

A pizza ordering terminal application by Seep & Sree

Our Idea

Why a 'Pizza Delivery App'?

We brainstormed a lot of ideas and finally settled for an app with Pizza, since everybody loves Pizza, so do we!

Overview

➔ 'Pizza Mania' is an app for small pizza shop owners.

➔ They make pizza in standard size.

➔ Selective options- pizza/crust/ toppings.

➔ Prefer cash payments than card.

Challenges

➔   Initially, we decided for 5 options but only could get down to 2 running.

➔   Faced lot of issues with git, but somehow navigated it towards the end. Phew!!

Address: 9-21 Hanover St, Oakleigh VIC 3166, Phone No:(03) 8564 8320

Our pizzas are made with fresh dough, come in generous (read large) size and have dollops of cheese

What pizza would you like today?
Select an option from below (0 to cancel)
1. Veggie Supreme $10
2. Pepperoni Delight $18
Please enter a valid option or enter 0 to cancel
1. Veggie Supreme $10

1
Your selected pizza is Veggie Supreme
What crust would you like today?
Select an option from below (0 to cancel)
1. CheeseStalker $5
2. Thin_is_in $5

We used nested hashes to store all the data. Then introduced method to make our life easy.

We have utilized Class to calculate the total price of the customer order.

Thank you!

Finally, we thank our esteemed customer for placing their order.
